REASONS FOR ALLOWANCE

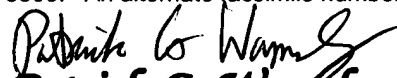

Claims 1-10 and 13-20 are allowed.

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious the recited combination of combining multiple analog currents to provide a reduced harmonic content output signal derived from a digital input signal sampled and stored at different clock phases.

U.S. Patent 7,019,677 to Soman et al discloses current steering DACs with self-calibration. U.S. Patent 6,992,608 to Zhang et al shows a current steering DAC having cross-talk reduction. U.S. Patent 6,977,602 to Ostrem applies the same data to multiple DAC cores, staggered in phase. U.S. Patent 6,927,714 to Teterwak uses differential transistors with a current steering DAC. U.S. Patent 6,822,595 to Robinson couples a switch [50] to first [46] and second [48] DACs. U.S. Patent 6,639,534 to Khoini-Poorfard et al uses first [110] and second [130] DACs with switching circuitry. U.S. Patent 5,880,689 to Kushner operates a pair of DACs [11/12] operating 180° out-of-phase to cancel glitch energy.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
